Discover how an understanding of adult attachment--the most advanced relationship science in existence today--can help us find and sustain love
"Over a decade after its publication, one book on dating has people firmly in its grip."
--*The New York Times*

We already rely on science to tell us what to eat, when to exercise, and how long to sleep. Why not use science to help us improve our relationships? In this revolutionary book, psychiatrist and neuroscientist Dr. Amir Levine and psychologist Rachel Heller scientifically explain why some people seem to navigate relationships effortlessly, while others struggle through adult attachment. Pioneered by psychologist John Bowlby in the 1950s, the field of attachment posits that everyone behaves in one of three distinct ways while in a relationship:
- Anxious people are often preoccupied with their relationships and tend to worry about their partner's ability to love them back

Professional Suggestions

by Clinical Partners

Dr. John

Hi dear Clara,
I have read your conversation recored:
"dating a plan boy2",
You were doing great,

and I have some suggestions to you....

Handwritten-style text representing suggestions.

Plase let me know if you need more specific
quesions,

Best, regard

2203 Sun.
I still missing him.....
